You can create anything your imagination can think of. (Not limited to simple cubes or blocks like some apps!) It uses polygon meshes as they used in ToyStory.It uses the 3DS file format which is compatible with many professional software like Autodesk 3D Studio, Maya, AutoCAD eBlender. This means you can create your moving models on your tablet or PC and import them later into the 3D package of your choice. Use tools like extrude, subdivide, smooth, pull, and more to create your 3D objects. Move the individual vertices around or move multiple vertices with the box selection tool. Paint faces in different colors. Rotate 3D shapes at any angle or choose from a list of views. Features:* 3D Modeling* Painting* UV* Mesh Primitives: Cube, Sphere, Cone, Cylinder, Tinkerplay Torus 1.2.3 APK DESIGN, CUSTOMe and 3D PRINT TO PLAYCom Tinkerplay you can easily design and print fun 3D characters, scary creatures or anything else you can imagine using the library in pieces. Just drag parts together and they fit together, as in reality. UNLEASH YOUR CREATIVITY!Customize your creation to make every part of you with amazing textures and shapes. Tap to change the entire part or use projection mode to design in detail.3D PRINT YOUR CREATIONSYour design is complete, you can easily 3D print all parts to make your creation real. Tinkerplay parts are easily designed for 3D printing, without rafts or brackets. Ready to print? STL or .thing print files is a snap. CREATE YOUR OWN OR TRY THE CHARACTER KITSU!make a scorpion or a ninja using the built-in character templates. Or mix things up and create a scorpion ninja with thorns and dinassauro skin. STRIKE A POSEPut your creation in the app and get a real-life sense Version. All joints in the app fold and twist like 3D printed parts. You can even create custom environments for that perfect photo of your masterpiece. PLAY WITH OUTROS!Ajosha has full multi-touch support so you can design with others. Or, if you want to impress, drag, rotate, throw away and modify pieces with lots of fingers at the same time. And don't worry, everything you do is automatically saved. Undo and redo atom. GO BIG!Print small pieces to hold your creation in your hand quickly, or print large parts to really impress. With parts that fit you can go as big as you want. Note: 1 GB of RECOMMENDED RAM for best performance. Terms of Service: information:Support: 123D Sculpt+ 2.0.2 APK Create fantastic 3D sculptures with Autodesk® Revit® software products, and other applications. [Editors' Reviews] CNET: An all-in-one office app with speedy performance oneof the best mobile office suitesUSA Today: Best Apps for Mobile Phones and TabletsGizmodo: Essential app for your new Android phone or tablet!There may well be better Office apps out there, but this is one of the best free ones. Economic Times: one of the best free document viewer andediting apps available [Support Page] 9d+ (Ninth Digit) 6.2 APK Prepare your phone for the ninth digit with just one click! The application is already prepared for the mobile phones of the states ofPR, SC and RS. Featured in G1 - Technology - Globo: //g1.globo.com/economia/noticia/2015/05/cell phones-of-six-states-pass-have-nono-digit-depart-this-Sunday-31.htmlThe 9d+ application (Ninth Digit) allows the quick and automatic updating of all contacts of your device to contemplate the inclusion of the Ninth Digit, which will enter into force in the states of Paraná(41, Forty-two, 43, 44, 45 and 46), Santa Catarina (47, 48 and 49) and RioGrande do Sul (51, 53, 54 and 55) on November 6, 2016 and that is already in force in all other states of Brazil.Avoid having to update your schedule manually through the 9d+(Ninth Digit)! RECOMMENDATION: Before using the REPLACE option, use the DUPLICATE option and verify that the number creation is correct. If so, use the DELETE option and then use the REPLACE option.NOTE: USE THE APP AT YOUR OWN RISK. It is recommended to back up your contacts through the Export feature on your mobile device before using 9d+or any other application that changes your contact calendar numbers. The application works on the vast majority of mobile devices, but due to the nature of the Android operating system, the result is unpredictable. The application allows the following operations:1) DUPLICATE: Choosing to duplicate your phone numbers, creating new numbers for your contacts already suitable for the ninth digit as prefix 9d+. This means that you will NOT lose any number of your current contacts. No existing information will be deleted or changed. In addition, your device will continue to function normally before and after the ninth-digit deployment. Use this ninth-digit option to take effect in your area, or if you want to test the final result before replacing your contacts.2) REPLACE: Choosing to replace your phone numbers updates your contact book to include owner-in-the-digit.3) REMOVE DUPLICATE PHONES: If you have used the DUPLICATE option of your contacts and want to delete them, use this feature. The application has intelligence to identify numbersbelonging to the cities of the states that will receive the Digit. If your phone is from one of these areas and you do not costume the DDD in your contacts, just check the option Add new digit to local numbers (without DDD), which will consider that your contacts should suffer the inclusion of the ninth digit. The application identifies and treats properly:-Radio numbers (e.g. Nextel, which will NOT suffer the inclusion of the ninth digit)-Numbers belonging only to the affected cities-Numbers registered with international prefix-Numbers registered with carrier codes-Mobile numbers that start with 5, 6, 7, 8 and 9operation, please envy an email to the developer, informing your mobile model. Tags: 9d + 9 d + novetomais novel+ 9 d + nine of plus 9d + ninth digit 9 digits ninth digit new number new number 9 more ddd 11 12 13 14 14 14 16 17 18 19 21 22 2427 28 31 33 33 34 37 37 38 61 62 63 64 66 6668 69 71 73 74 7577 79 81 81 83 84 85 86 87 88 89 91 91 93 94 94 96 97 98 9 9 BA SEMG embratel hi of course tm vivo 91 41 42 44 44 44 47 47 48 49 5153 54 55 pr sc rsPrepare your phone for the no digit with just one click! The application is already prepared for the PRstates, SC, and RS cell. Featured in G1 - Technology - Globo: //g1.globo.com/economia/noticia/2015/05/celulares-de-seis-estados-passam-ter-nono-digito-partir-deste-domingo-31.htmlThe 9d + application (ninth digit) allows fast and automaticupdate of all contacts from your device to contemplate theinclusion of the ninth digit, which will take effect in the statesof Paraná (41, 42, 43, 44, 45 and 46) Santa Catarina (47, 48 and49) and Rio Grande do Sul (51, 53, 54 and 55) on November 6, 2016and is already in force in all other states of Brazil.Avoid having to manually update your calendar through 9d +(Ninth Digit)! RECOMMENDATION: Before using the REPLACE option, use the DUPLICATE option and verify that the number creation is corrected. If so, use DELETE and use only the REPLACEMENT OPTION. NOTE: USE THE SOFTWARE AT YOUR OWN RISK. It is recommended that your contacts use the Export link on your mobile device before using 9d+ or any other app that changes your address book number. The app works on most mobile devices, but due to the nature of the Android operating system, the result is unpredictable. The application allows the following operations:1) DUPLICATE: Choosing to double your phone numbers, creates new numbers for your contacts already suitable for the ninth digit to prefix 9d +. This means that you don't lose any number of your current contacts. No existing data will be erased or changed. In addition, your machine will continue to function normally before and after the implementation of the ninth digit. Use this nonodigit option to take effect in your area or if you want to test the final result before your your REPLACE!MENT. Choosing to replace your phone numbers updates your address book to include nonodigit.3) REMOVING DUPLICATE PHONES: If you have used the option to DUPLICATE your contacts and want to delete them, use this feature. The application has intelligence to identify numbers that belong to the cities of the states that will receive the ninth digit. If your phone is one of these areas and you don't register usual DDD in your contacts, just check the Add new digit local numbers option (no area code) that will consider all your contacts who should be included in the ninth digit. The application correctly identifies and addresses:radio -Numbers (for example, Nextel, DOES NOT suffer the inclusion of nonodigit)-Numbers Belonging only to affected cities-Numbers registered with prefix-international numbers registered in the codes of the carrierMobile -Numbers from 5, 6, 7, 8 and 9operation, send an email to the developer informing your phone model.
